Managed Service Provider
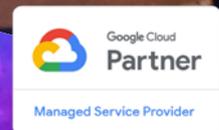

Appsbroker Academy is a Google Authorised Training Partner that delivers certified learning pathways and bespoke industry-specific training. We augment our delivery with expert sessions, hands-on labs and hackathons, leveraging over 12 years of deploying GCP workloads at scale for large enterprises.

Challenges

You can't successfully execute a cloud strategy without the required skills and competence in your organisation. Ad-hoc training alone will not accelerate your time-to-capability - you need a programmatic approach that aligns with projects, workloads and overall business objectives.

Solutions

Appsbroker Academy delivers a strategic, agile, objective-aligned training programme. The programme is geared towards your workload priorities, with the goal of digital skill parity across your organisation. The scale of project management and governance can be tailored for medium or large enterprises.

Our training is verticalised and tailored to your industry to make it relevant for the learner. We also offer a public training schedule based on popular GCP learning paths and certifications, as well as free webinars and training taster sessions.

Comprehensively trained organisations are **80% faster** to adopt the Cloud.

IDC, 2017
