Cloud Assure

appsbroker

Introducing Cloud Assure, an enhanced billing framework to enable you to confidently grow with Google Cloud.

Drive maximum value from your Google Cloud Platform at no additional cost, with a unique service wrap that provides the security to deploy business-critical applications at scale.

With centralised billing through Appsbroker's portal, you can gain a single view across all of your consumption allowing you to accurately predict costs. For new customers, Cloud Assure helps you onboard quickly and securely whilst reducing challenges and teething issues.

Cloud Assure also provides value-added services such as Professional Services vouchers over and above standard contracts, proactive monitoring and alerting, and access to exclusive technology partner services.

As you grow, so do your options, and our support!

Enable

Start the journey to a better way of working with our adoption framework and consolidated billing

Assure

Deploy services with the backing of substantial additional indemnity insurance

Control

Run GCP as a single cost centre with usage analysis through our Service Delivery Team

Grow

Take advantage of the full capability of cloud through Professional Services credits
