Actionable Roadmap to Data Insight in 2.5hrs

Data Modernisation Workshop

Key Takeaways

Build a framework to grow revenue by 40% year-on-year - through modernising your data and adopting real-time insights.

Make faster, better-informed business decisions - with critical information delivered to the people who need it within five seconds.

Increase cost efficiencies - make the most of the data you already have by empowering your existing teams to use better analytics at the point of work.

Discover how to transform your data performance on **Google Cloud Platform** in our 2.5 hour workshop.

1 — Insights into Current State

We will assess how effectively your organisation currently uses data against best practices, covering the following areas:

Teams, technology, current internal initiatives, recent customer wins.

2 — Data Empowerment

We will take a deep dive into the pain points that are holding your business back, and empower your team to improve:

Time from idea to value, quality and trust of your organisation's data, maturity of your organisation's capabilities (e.g. BI, AI, ML).

3 — The Art of the Possible

Align your business ambitions with the leading data strategies of today and tomorrow, and outline your road to achieving data parity.

4 — Launch Preparations

Agree on your target objectives for data migration and address the blockers you need to overcome in order to achieve velocity.

5 — Actionable Roadmap

Outline a roadmap to take you from launch through to meeting target objectives while continually delivering value. Use best practices such as Agile to keep iterating and improving.

Let's get migrating!
